

ACROMARK 590 SERIES

- * Rugged, welded steel-frame construction
- * Heavy-duty, double-acting, direct air power cylinder, 2½ tons
- * Dual hardened steel shaft and linear-bearing precision head guiding
- * Adjustable stroke-cylinder depth stop
- * Simplified, manual head set up feature
- * Motorized foil feed system with scrap rewind and time saver foil load provision
- * User-friendly, all-in-one graphic controller with touch-screen controls
- * Rigid work base with adjustable head-elevating mechanism
- * Dual electric safety hand switch actuation with anti-tie down, anti-pinch point circuitry
- * Optional tubular steel floor stand

Applications for the 590 Series include all types of parts from dials and gauges for automotive and electronic items to decorative applications for the cosmetic, toy and appliance industry. An excellent machine for long and short production runs alike, the presses can be equipped with auxiliary work feeders, air inflation mechanisms for blown-bottle stamping, rotary indexers, delayed action foil stripping and systems for electric eye indexing of preprinted Heat Transfer/Digital Heat Transfers. This is the ultimate hot stamping press for any decorating department.
